Mr. Alan H. Chew  
P.O. Box 126  
Jensen, UT 84035

Dear Mr. Chew:

Thank you for your "Notice" submitted to this office on July 29, 1994 in regards to the surface management regulations (43 CFR 3809) for work to be done relative to your Flagstone Placer Mining Claim UMC268644, located in the N $\frac{1}{2}$ NW $\frac{1}{4}$ SW $\frac{1}{4}$ , Section 9, T5S, R25E, SLB&M. Its' contents are in order and complete and is hereby accepted. Acceptance of this Notice will not now, or in the future serve as a determination of the validity of any mining claim to which it may relate.

Following our Specialists Review of the proposed action and a general review of your Notice filed in accordance with 43 CFR 3809.1-3, we advise you of the following:

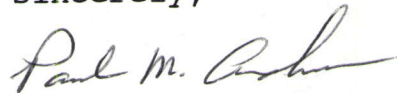

1. You, as operator of the area, are to conduct all operations in such a manner as to prevent unnecessary or undue degradation and shall comply with all applicable Federal and State laws (see 43 CFR 3809.2-2 and 3809.3-1). A list of agencies you need to contact depending on the extent of your operation was given to you during your visit to this office on 7/29/94. An additional copy of this list is attached for your convenience.
2. As much topsoil as possible will be removed from above the rock and stockpiled for redistribution and seeding later. The area to be excavated about the rim should be left generally flat. Float material removed from the bottom of the draw should not cause a situation requiring any reclamation.
3. If any historic, prehistoric, or fossil remains are located during mining operations, the operator shall cease operations immediately and notify Blaine Phillips, Vernal District Archaeologist at (801) 781-4438.
4. Hazardous Materials: Less than 10,000 pounds of any chemical(s) from EPA's Consolidated List of Chemicals Subject

to Reporting Under Title III of the Superfund Amendments and Reauthorization Act (SARA) of 1986, and less than the threshold planning quantity (TPQ) of any extremely hazardous substance(s), as defined in 40 CFR 355, shall be used, produced, transported, stored, disposed, or associated with any operations on the public lands, including this accepted Notice. The lists of these substances are available at the Vernal District BLM Office and for any further information concerning these regulations please contact Vernal District's Hazardous Materials Coordinator, Keith Chapman, at (801) 781-4431.

5. The project area will be periodically inspected in accordance with BLM Policy. Access to the area is across private land which is generally fenced, gated, and locked. Please advise Dick Wilson or myself about providing us access.
6. Your Notice has been assigned serial number UTU66378 and a Case File will be maintained at the Vernal BLM District Office under this number.

If you have any questions, please contact Pete Sokolosky or Dick Wilson at (801) 789-1362.

Sincerely,

Paul M. Andrews  
Manager  
Book Cliffs Resource Area
